V1.0 - 260610

WINLET 400 TL

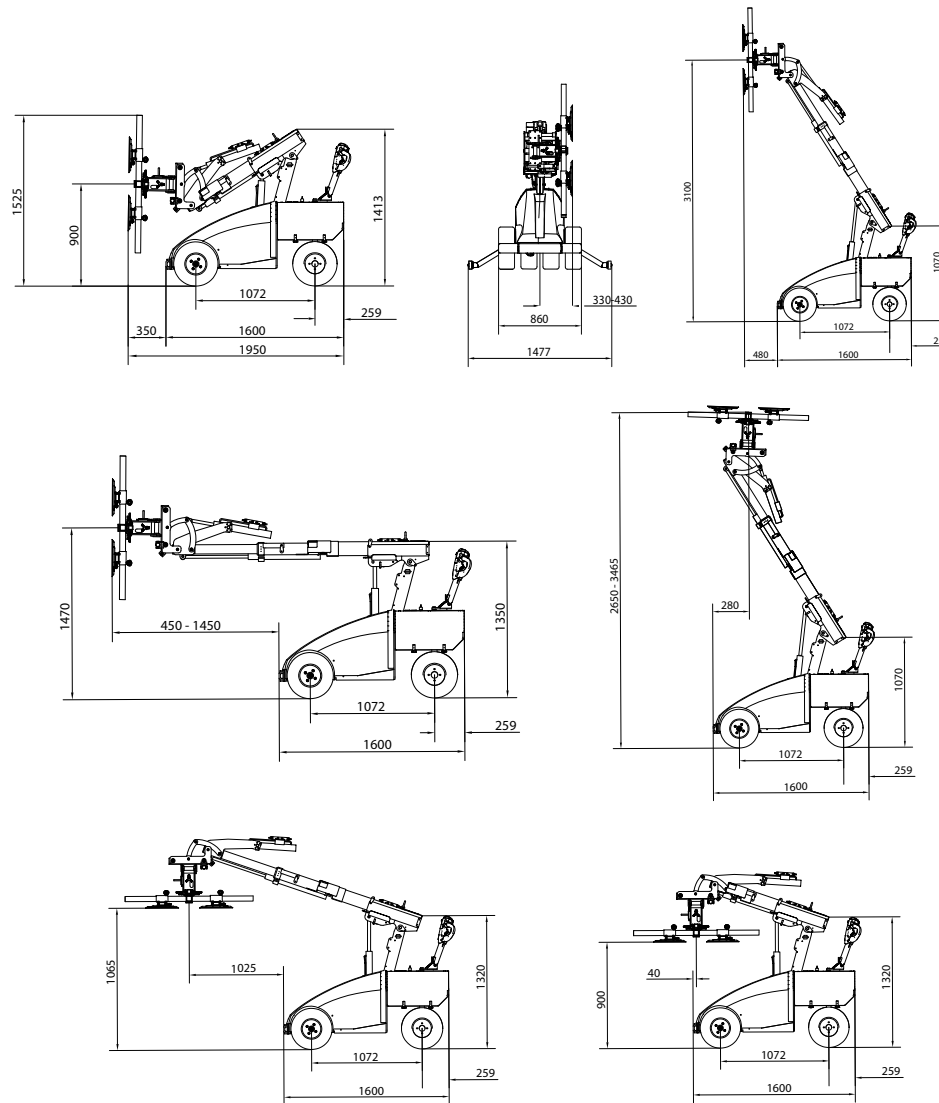

The Winlet 400 TL is one of the latest models. A maximum capacity of 415kg and the ability to lift loads over 3.5m directly overhead makes this a powerful glass installation machine. Yet it remains highly compact and manoeuvrable, making glass lifting easy.

At just 850kg, with counterweights, the Winlet 400 TL glazing robot is light enough to be carried in small construction hoists and even public passenger lifts if glass needs to be replaced as part of building maintenance.

Winlet insight: As with all Winlet glazing robots, the Winlet 400 TL is a highly sustainable choice for glass installation. As an electric glass lifter, with long-lasting batteries and rapid recharge, it is fume-free. Winlet glazing robots also encourage safe and efficient operation by simplifying the glass installation process and minimising manual handling.

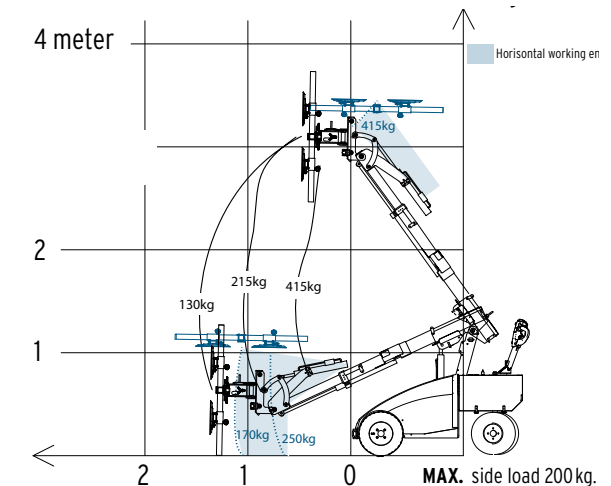

Technical Specifications

Max. Lifting Capacity	415 kg
Max. Load Arm Out/In	130/415 kg
Max. Side Mounted Load	200 kg
Total Length	1950 mm
Total Width (Single mounted tires)	860 mm
Total Width (Twin mounted tires)	N/A
Weight	942 kg
Lifting Height Vertical cups, center of lifting yoke	3100 mm
Extension Min/Max Front bumper to suction cup	450 mm / 1450 mm
Lifting Height Min/Max Horizontal cups down	0 mm / 1065 mm
Lifting Height Min/Max Horizontal cups up	2650 mm / 3465 mm

(All specs E&OE and subject to change)
