# MONITOR 30T

**Light weight, with excellent reach and the ability to navigate through a single door way, the 30T is a machine to be reckoned with.**

At only 4.5 t, this Spider Lift can still manage 30.3 m of working height and 14.2 m of horizontal outreach. Built for rough terrain, the 30T has multiple leg positions, which have the ability to auto level on slopes up to 17°. This allows you to tackle those tough applications that you've never been able to achieve.

Hydraulically expanding tracks provides the 30T with the ability to compact down to only 890 mm wide & 1962 mm high. Its large 1.8 m detachable basket complements its 230kg MRC, which allows the operator to move freely, achieving his task more efficiently & effectively.

After completing a task, the 30T has an Auto Stow feature. It is able to pack itself up in the correct position at just the press of a button, which makes your job simple at the end of a hard day's work!
